(54) WIRELESS DATA COMMUNICATION METHOD AND DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To solve the problem in the conventional wireless data communication methods that the data in units of packets are communicated in wireless manner between its own station and an opposite station that has deteriorated a communication efficiency, because a small packet length is fixed.

SOLUTION: The wireless data communication method decides the length of a succeeding packet on the basis of the length of a packet, whose communication is finished to attain efficient communication at all times.
